DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1 to 3, 7 to 9 and 13 to 18, drawn to a steel sheet, a tension mask and a cathode ray tube comprising a tension mask, wherein the steel sheet comprises, in weight percent, less than 0.1% C, less than 0.2% Si, 0.4 to 2% Mn, less than 0.1% P, less than 0.03% S, less than 0.1% Al, 0.003 to 0.02% N and the balance Fe, classified in class 315, subclass 1+.
 - II. Claims 4 to 6, 10 to 12 and 19, drawn to a method of making a steel sheet for a tension mask having a composition comprising, in weight percent, less than 0.1% C, less than 0.2% Si, 0.4 to 2% Mn, less than 0.1% P, less than 0.03% S, less than 0.1% Al, 0.003 to 0.02% N and the balance Fe, wherein the process comprises hot rolling, cold rolling and annealing the steel sheet, classified in class 148, subclass 121.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product as claimed can be made by a

Art Unit: 1742

materially different process such as for example, the prior art methods disclosed in the specification at page 2, the last paragraph and page 3, line 17 to page 4, line 4).

While it is noted that claims 13 and 14 are product-by-process claims and incorporate the same process steps as described in the process of Group II, a product defined by the process by which it can be made is still a product claim (In re Bridgeford, 149 USPQ 55 (CCPA 1966)) and can be restricted from the process if the examiner can demonstrate that the product as claimed can be made by another materially different process such as the alternative process described above. See In re Brown, 173 U.S.P.Q. 685, and In re Fessmann, 180 U.S.P.Q. 324, for analysis of weight given to process step recitations in product claims also see MPEP 2113 and 806.05(f).

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and because the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement is traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
